

User Guide

Step 1

Observe the graphics in the upper-left area and think about which ones form a group.

Step 2

Select in the lower area the graphics you think belong to the same group.

- When dealing with dense graphics, you can use:
 the box-selection mode or  the path-selection mode
- Click an already-selected graphic again to deselect it.
- In normal mode you can zoom and pan with the mouse wheel.

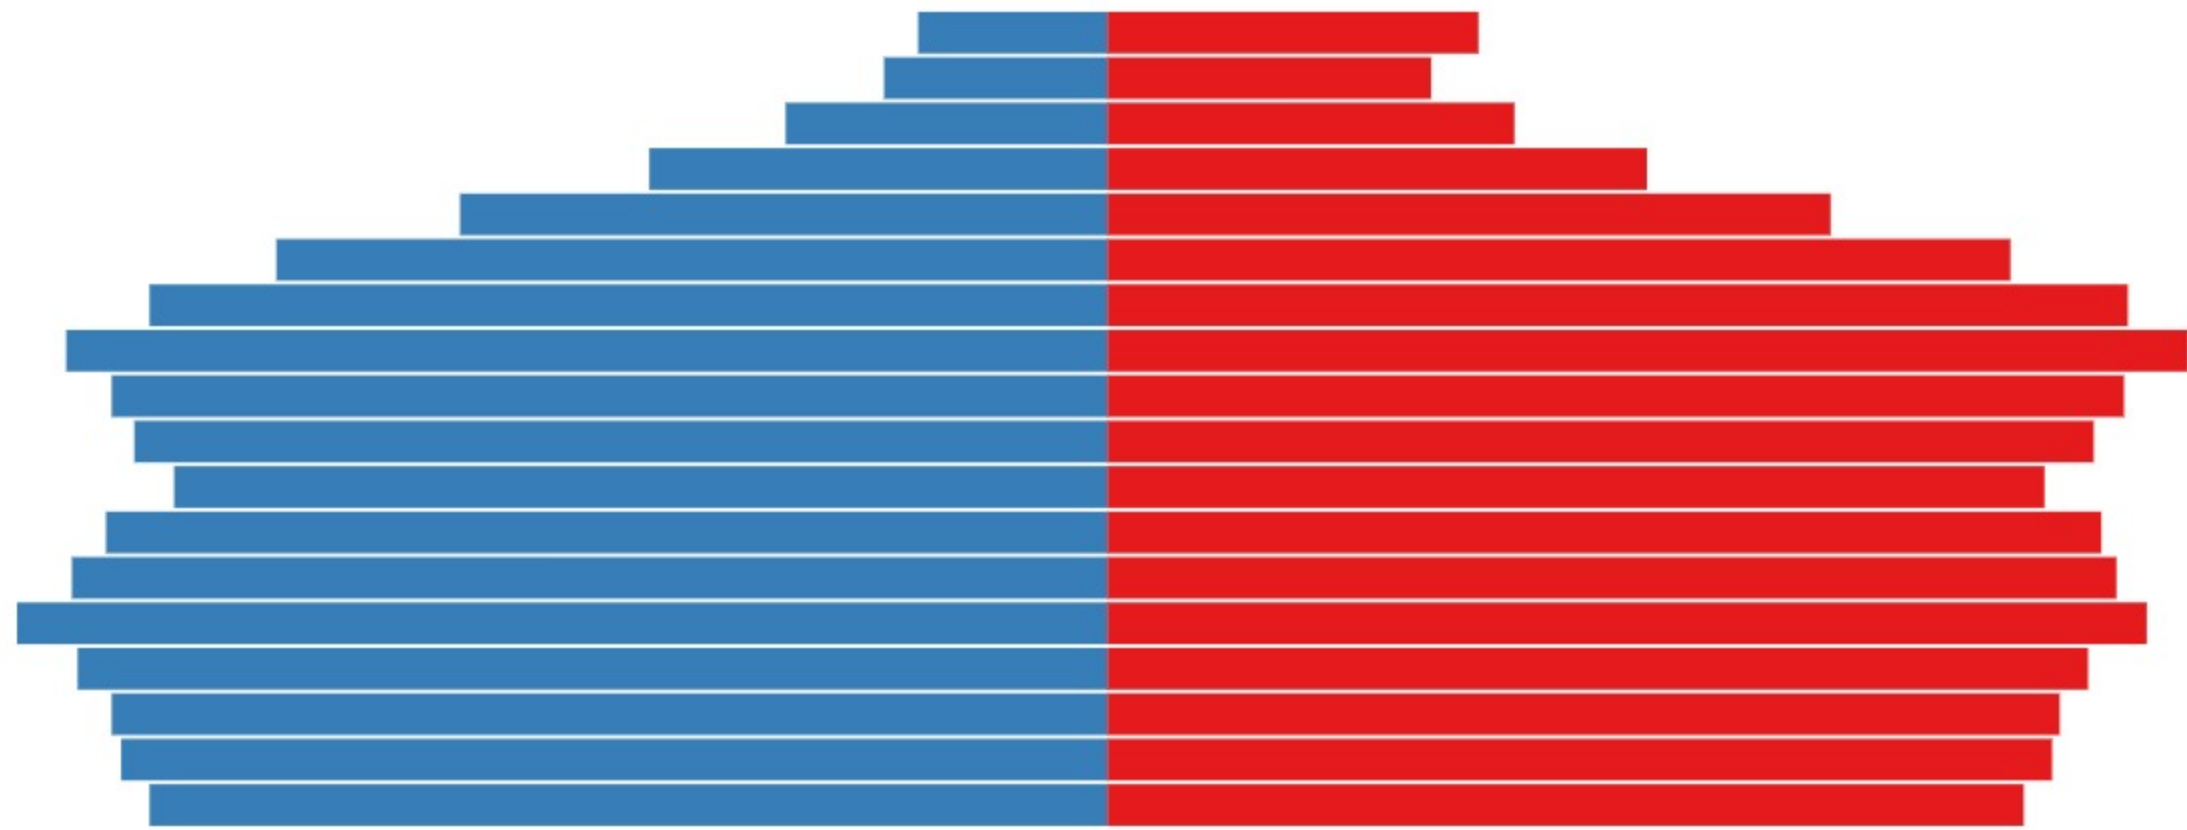

Step 3

If you need a new group, click the plus button on the right to create one.

Step 4

After finishing a group selection, don't forget to rate that group.

Out-group Exclusion:

   Low

Important Tips

- Please identify as many graphic groups as you perceive.
- A graphic can belong to multiple different groups.
- Please make selections and ratings based on your intuition.
